

WORK TRUCK FOR NETSUITE

Engineering & Bill of Materials Management

Work Truck for NetSuite transforms the #1 cloud-based business management software suite, NetSuite, into a complete system with all the features that vehicle upfitters need.

Get the scalability, accessibility, and flexibility of NetSuite without compromising on the features needed to support your unique business.

Highlighted Features

Bill of Materials Configurator

Set up custom logic to generate accurate BOMs for any order configuration.

BOM Cost Rollup

Calculate accurate assembly costs for any configuration in real time.

BOM Add/Swap/Remove

Add, swap, or remove components from assemblies system-wide with a simple, intuitive form.

Product Change Notices

Store detailed information about changes to your assemblies and control updates with effective dates on individual components.

MRP Report Ensure material availability with accurate BOMs that relieve inventory accurately.
