Batch Create Work Orders

Filter open Sales Orders by Location, Product Type, and Model, then instantly create Work Orders to schedule for Production.

Eliminate scheduling errors with online and offline dates visible on Unit records.

Use digital Work Order records to support and improve your existing production processes, keeping track of vital information at every step.

Simplified Production Scheduling

Work Truck for NetSuite puts all in-progress units right at your fingertips, allowing you to choose when and where you want to produce each unit. Simple and easy-to-read scheduling interfaces make it easy to plan ahead and organize resources.
